

Environmental Approvals

MBS Environmental has a team of staff highly experienced in managing the regulatory approvals for all scales of project throughout Australia and internationally.

MBS Environmental has a strong track record in the co-ordination of approvals process(es), including:

- Strategic project planning.
- Site selection and project layout.
- Stakeholder consultation.
- Baseline studies.
- Impact assessment using risk assessment and management.
- Preparation and submission of documentation.
- Regulator liaison and negotiation.
- Offset development and approval.

MBS has detailed practical knowledge of the legislative environmental approvals process at the Australian Federal and State/Territory levels, and has working experience in Western Australia, Queensland, Northern Territory and New South Wales. We can also assist with international projects.
