

Auditing and Compliance Management

MBS Environmental has experienced environmental auditors capable of conducting audits for a wide range of purposes, across a wide range of sectors and project stages. Audit teams are led by certified professionals with practical industry experience ensuring they understand your business and how best to assist you with minimising environmental risk exposure.

MBS can assist with:

- Environmental Management System audits (ISO 14001).
- Mandatory reporting to Government.
- Compliance audits and management of legal obligations.
- Site inspections.
- Development and gap analysis of environmental management systems.
- Development and implementation of Environmental Improvement Programs.
- Technical reviews to assess compliance with funding agency requirements (IMF, World Bank, Equator Principles).
- Due diligence reviews to support company mergers or acquisitions.
- Certification of documents for submission to regulatory authorities.
