

## Ecological Services

MBS Environmental has extensive experience in the completion/management of technically robust Flora and Fauna surveys in support of approvals for mining and infrastructure projects. MBS ecological personnel have experience in ecological surveys across most biogeographical regions of WA. Ecological expertise at MBS includes:

- Desktop flora and fauna assessments, including ecological risk and impact assessment.
- Targeted searches for Conservation Significant flora and fauna.
- Level 1 (reconnaissance) surveys for flora and vegetation, fauna and habitats.
- Stygofauna surveys.
- Pre-construction surveys according to Environmental Impact Assessment documentation.
- Fauna clearance (pipeline trenches) and relocation.
- Management of specialist ecological sub-consultants.
- Rehabilitation planning and monitoring
- Groundwater Dependant Ecosystem (GDE) assessment.
- Development of flora and fauna Management Plans.
