

## Environmental Auditing and Compliance Management

MBS Environmental has experienced environmental auditors capable of conducting audits for a wide range of purposes. Our auditors work across a wide range of sectors and project stages to provide our clients with information on corporate environmental risk and compliance with environmental obligations.

MBS can assist with:

- **Environmental Management System** audits (ISO 14001).
- Conducting **compliance audits** for:
  - Submission to regulatory authorities (Federal, State and local government) to fulfil mandatory reporting requirements.
  - Internal voluntary use to provide companies with information on obligations and status of compliance.
- Regulatory and voluntary **site inspections** to identify environmental hazards and incidents.
- **Compliance management** (Obligations Registers, Performance Review Reports, Annual Environmental Reports).
- Development and implementation of **Environmental Improvement Programs**.
- **Technical reviews** to assess compliance with funding agency requirements (IMF, World Bank, Equator Principles).
- **Due diligence reviews** for potential company mergers or acquisitions.
- **Gap analysis** to identify technical issues and effectiveness of operational control for specific projects from project planning through to project closure.
- **Certifying documents** for submission to regulatory authorities.

MBS Environmental audit teams are led by **certified professionals** (Exemplar Global) with solid industry experience so they understand your business and how best to assist you with minimising environmental risk exposure.
